Attachments: Blackwell Zinc PHA_dv watermark_02082018.pdf; Blackwell Zinc PHA Data Validation Cover Memo_signed.pdf

I am forwarding the attached pre-decisional draft of the Public Health Assessment for BW from ATSDR to you for your review and comment. ATSDR is providing this draft to partner agencies that contributed to the PHA for review and comment. In specific, they are requesting review in relation to data applicability and use. The pre-decisional draft is not meant to be released to the public. I believe the initial work on this PHA began back in 2009.

It looks like most of you are available next Monday at 10:00 am. In order to further plan for our response, I would like to schedule a planning meeting on Monday, February 12 at 10:00 in Room 704 to discuss our response including who else needs to be involved or briefed, assignments and timelines for preparing an overall draft, and vetting the agency response. I will f/u with an Outlook Calendar invitation.

*Kelli – We can link with you by telephone if you are available. If you are not available, I can f/u with you after the meeting.

Let me know if you have comments or questions.

Edd

Subject: FW: Predecisional Draft of Blackwell Zinc Smelter site Public Health Assessment

Hi Amy, Dr. Rhoades and Bart,

Per our discussions today, please find attached the draft ATSDR Blackwell ZINC Public Health Assessment for your review and comments. Our lead health assessor CDR Deborah Boling included a cover letter with guidance and time lines. As the ATSDR Regional Rep for this site, I am happy to speak with you at any time during your review. This is a draft document to be reviewed with a technical lens to ensure the data we used provided by those agencies (ODEQ, ODH and EPA) is accurate. Your comments will be incorporated in a second document. This second document will be shared with the community for review with an open comment period. Then a final document is completed and provided to library or local repository.

I am planning on sharing the document with Paula Selzer with the EPA Children's Health Program, as well as Dr. Steven Borron with our Pediatric Specialty Unit so they too can be aware of the findings of this

document.

ATSDR is at some point in the future planning on a public availability session in Blackwell, OK to meet with community members. We will extend invitations to all stakeholders interested in attending. After the comment period closes, I can set up conference calls to address best methods for rolling out information to the public and craft a plan in concert with the State of Oklahoma and EPA.

Respectfully,

CAPT Patrick Young, MS, RS
U.S. Public Health Service
ATSDR R6 Regional Rep
Division of Community Health Investigation
Dallas, Texas
214-665-8562 (o)
